## ALL ABOUT US

RGP Electronics India Pvt. Ltd has over a decade of industry experience which began with maintenance and service contracts of Telecom Products. Over the years the company has developed expertise and expanded its product portfolio to related segments. We are proud to have executed many private and Government projects in Andhra Pradesh and Telangana region. We take pride in our quality of service and have served more than 1000 satisfied customers in our company's lifespan.

**Extensive Industry Experience:** A decade of executing complex projects for various clients have given us a unique and extensive experience. We have executed several turnkey projects with customized solutions designed to meet the client's specific needs. We provide design, execute and support any complex requirement that you may have.

**Authorized Channel Partner:** We use several different technology vendors to make sure that our client gets the best solution and value for money. We are certified and authorized channel partners to some of the industry leading brands like Honeywell, Mobotix, Cisco, Avaya, Unify, Tyco and many more.

**Project Management:** We are an end-to-end solution provider who is dedicated to making any project successful within the defined targets. Every project is implemented ensuring that it is tailored to meet clients requirements, timelines, budgets and with minimal impact to the business.

**Account Management:** We recognise the importance of working in partnership with our clients, however simple or complex their application may seem, RGP Electronics has proved to many clients the ability to provide an innovative approach to problem solving & implementing unique solutions.

**Post Sales Support:** The importance of supporting and building ongoing relationships with clients and suppliers is utmost importance for us. It is inevitable when implementing such business critical solutions that relationships are built between both clients and supplier.

## OUR CORE VALUES

Success will follow when we serve our clients well. Our assets are our people and reputation. In a service business, we know we cannot be the best firm unless we have the best people. We take pride in the professional quality of our work.

# OUR PRODUCTS

## Unified Communications

### Voice Communication

Experts in Digital EPABX System, VoIP, Teleconference bridges such as Meet-me, Asterisk Software based SIP PBX, Call Center Solutions, Audio Conference phones and SIP/IP Phones

We have the business partnership with Alcatel-Lucent, Avaya, Karel, NEC, Matrix and more. We will provide you with the best business phone system for your communication needs.

### Video Communication

A successful video conferencing deployment requires more than just installing the latest equipment. We will support you with expert knowledge and advice to choose the most appropriate equipment for your workplace, including video, display, control, speakers, microphones, furniture, blinds and taking into account ambient lighting and acoustics.

## Electronic Security

### IP Surveillance

CCTV Surveillance is an extremely powerful solution, deterred against crime and vandalism, providing unobtrusive highly effective protection of both premises and people. Our engineers are fully trained and accredited for the installation of CCTV and Internet Protocol (IP) CCTV systems.

- Activity Sensors
- Event recording
- ANPR / Fast response
- Video analytics
- Reliable Alarm Management
- Perimeter Surveillance

### Access Control

RGP Electronics have the capabilities and experience to provide the optimum security solution to protect our client's corporate assets. Our system designs range from a simple PIN controlled electronic door release to a variety of biometric readers.

- Networked systems
- Biometrics
- Time and attendance
- Face readers

### PA & Paging Systems

RGP Electronics help our clients to design their Public Address (PA) system to the highest standard, whilst ensuring total compliance with life safety regulations. In addition to life safety applications, our PA systems can also be used for simple day to day functions such as playing background music or a variety of other functions to suit the surroundings or application

### Fire Alarm & Safety Systems

RGP Electronics are fast movers towards fire detection, notification & suppression systems. Successfully delivering fully integrated systems in the most demanding of environments within the public, private, education, retail, commercial and transportation sectors.

We design, install and maintain all types of automatically-operating fire extinguishing systems and electronically activated fire detection and alarm systems.

- Fire alarm systems
- Clean Agent suppression
- Air sampling
- Fire extinguishers
- Intrinsically safe products
- Smoke / heat detectors

## Office Automation

### Projectors

With a huge variety of projectors available, finding the right one can be difficult and the choices baffling. RGP Electronics are able to advise you on which projector will best suit your requirements and budget.

With various sizes, surface & format to consider as well as your budget. RGP Electronics can help you select the best screen and accessories like projector mounts, Cables, wireless dongles, Spare lamps, etc., to meet all of your requirements.

### Display Panels

The huge range of flat screen displays now available can be bewildering. RGP Electronics can advice you on how to make sure you install not only the correct unit in terms of technology, but also to future proof your investment and decide whether a commercial panel is more appropriate than a more consumer orientated "TV"

### Board Room Solutions

Companies of all sizes have meeting rooms and boardrooms which can be used for a variety of purposes; for meetings, presentations, conferencing, brainstorming sessions or training. The systems integrated into these rooms must function at a highly technical level, yet be simple to use allowing employees to collaborate without inconvenience.

We will help you with the most user friendly solution that is specific to your needs.

## Additional Services

RGP Electronics has long standing business association with Tata Telecom and BSNL. We provide the following additional services through this association.

- PRI Lines
- MPLS
- Leased Lines

## Solutions On Rent

For our customers we also provide rental solutions through BSNL for the following services.

- EPABX
- CCTV
